

UPS to Solar PCU

Digilog UPS2PCU is for those who have already invested in Inverters or UPS. It converts any Inverter or UPS into a solar Generation system. This product will preserve your investment and make you a proud owner of renewable energy generating system.

UPS2PCU would take care of charging the battery and as well as supplying grid voltage to the inverter from solar input / Battery depending on the state of battery charge and solar availability. In case of both solar generation and Battery levels being low, UPS2PCU provides Grid from main Electricity board grid connection to the Load.

Features

- Inbuilt Intelligent Solar Charger
- Utility Input of the UPS is controlled based on the availability of Solar Power and the Level of the Battery
- Maximum Solar Power Extraction
- Intelligent Battery Management
- Higher Power Conversion Efficiency
- Intelligent Battery Monitoring
- Universal Inverter / UPS compatibility
- Affordable Roof Top Solar System Solutions
- Lower Electricity Bills

Available for Inverter ratings

- 300VA to 850VA in 12V
- 1000VA to 2000VA in 24V
- 3000VA to 5000VA in 96V
