

Digi-Track

The premiere vehicle management solution is based on eco-friendly GPRS technology to monitor and track vehicles ensuring optimum utilization of resources, logistical reliability and cost-effectiveness. The service based model eases and improves efficiency of operation.

Product

Digilog products and services concentrate on conserving energy and at the same time ensure optimum utilization of assets to enhance productivity and reduce wastage. The company banks on GSM/GPRS technology which is the foundation of Digi-Track.

Features

- Compact size for unobtrusive installation in the vehicle
- GPRS technology provides regular, accurate location data at an optimum cost
- Reporting frequency is configurable by authorized personnel from remote servers
- Data logging capability in the absence of GPRS network
- No manual operation required
- Tracking reports generated based on location, distance, speed and geo-fencing of user defined locations

Components

- Hardware
- GPS / GSM antenna
- Software
- User authentication via user name and password
- Accessories
- Web enabled application

Customized reports to suit the industrial needs such as:

- Tracking reports
- Speed violation reports
- Over speed
- Alerts
- 24 X 7 multi lingual customer care support
- Idle time reports
- Geo fencing based reports
- Entry and exit of geo fenced locations
- Services
- PAN India service centre network

Applications:

The need for Digi-Track arose since tracking was becoming indispensable to various businesses especially the ones that involved vehicle management. Digi-Track provides customized solutions for businesses. The following are the common applications to most businesses:

Logistics

- ✓ Fleet Management
- ✓ Commercial Vehicle Monitoring
- ✓ Public Transport Systems
- ✓ Taxi Services

Asset Management

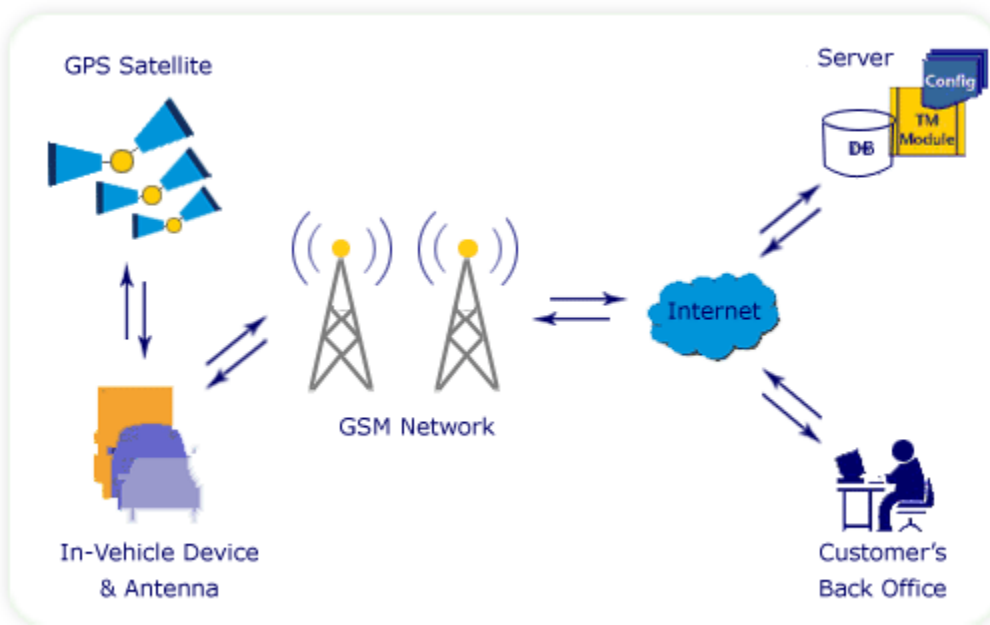

- ✓ Delivery and Courier services
- ✓ Emergency Vehicles and Security

Benefits

Vehicle tracking has become inevitable to businesses because it ensures constructive and better utilization of assets. The core benefits that organizations and individual clients merit from Digi-Track are the enhanced efficiency of operations and cost-effectiveness.

The inbuilt applications constitute the following:

- Tracing the route of vehicles which is then presented in tabular forms
- Monitoring and recording of route deviation
- Recording idle time
- Tracking speed of vehicles constantly and reports generated
- Tracking of distances covered by Gen-Track installed vehicles

Perks to the end-user is inclusive of:

- Increase in fleet efficiency and productivity of moving assets
- Reduction in fuel consumption through regularization of driving pattern
- Prevention of pilferage maintained using the idle time report
- Check on over speeding is an enhanced safety measure to protect people and assets
- Decrease in servicing cost and break down time of vehicles
- Increase in the accountability of people driving the vehicles
- Guaranteed customer satisfaction

The world is becoming more and more sensitive to preserving the ecology; however the demand for fossil fuel is ever growing. In times like these, we have moral obligation to reduce pollution and the solution lies in optimizing your fleet wherein you save energy and limit your expenses. And it is about time we give back after all we have only one earth to cherish.
